OBJECTIVE

To obtain a promising career in an innovative organization where I can utilize my capabilities and technical skills and contribute consistently and significantly to the organization.

PERSONAL PROJECTS

- **Design and implementation of a car parking system using verilog for FPGA based applications**
  - Designed and implemented a smart car parking system using Verilog HDL on an FPGA platform. The system monitors parking slot availability, controls gate access, and displays real-time status using digital logic. Optimized for low resource usage and real-time operation.

- **Atm Functionality Using OOPS (Console Based):**
  - Developed a console-based ATM simulation in Java applying Object-Oriented Programming principles such as abstraction, encapsulation, inheritance, interfaces, and polymorphism. Implemented key features including PIN validation, OTP verification, balance inquiry, cash withdrawal, deposit, transaction history (mini statement), and password/PIN management. Designed modular classes to ensure code reusability and maintainability, while enforcing input validation without exception handling. Enhanced security by integrating features like Change PIN/Password with no reuse policy and Forgot Password logic via mobile verification and OTP.

TECHNICAL SKILLS

- **Programming Language:** Core Java.
- **Frontend :** HTML, CSS.

SOFT SKILLS

- Adaptability
- Time Management
- Quantitative Analysis
- Critical Thinking
- Attention to Detail
- Positive Attitude

ACCOMPLISHMENTS

- I have completed an internship in Embedded Systems at SkillDzire.
- Presented a Paper presentation on Nano technology at PBR vits Engineering College, Kavali.
